

ESNICO®

SHANGHAI ASNK INDUSTRY CO., LTD.

Safety Storage Cabinet

Details of the Cabinet

ESNICO safety cabinet is made of double wall structure with 38mm (1-1/2") air space between it. The paint is highly corrosive and rust resistance with lead-free epoxy powder coating finish. The three-point linkage lock makes the flammable liquids storage safer. The adjustable shelves, dual ventilation holes and the 5.1mm (2") bottom sump are for added security.

Double person double lock design. A three-point linkage lock plus a padlock makes the lock safer.

Adjustable shelves makes the space fully used, and the loading weight varies from 50 kg to 100kg

Three-point linkage lock design. The cabinet would be locked from the top, middle and bottom.

The bottom sump (2"/5.1 cm) to collect the overspill.

Ventilation holes at both sides. One is at the top and the other is at the bottom

Safety Storage Cabinet

ESNICO safety cabinet is used for the storage of flammable liquids. The safety cabinets reduce the risk of fire, and ensure the safety of life and property. It complies with the standard of FM6050, 29 CFR 1910.1450 and NFPA Code 30.
