

SPECTRUM LINES TR L.L.C

Poly Drum Trolley

Product Overview

The Poly Drum Trolley is a durable and ergonomically designed solution for the safe transportation and temporary spill containment of industrial drums. Manufactured from high-quality polyethylene, it offers excellent resistance to chemicals, corrosion, impact, and harsh weather conditions, making it ideal for demanding industrial environments.

Designed with an integrated spill sump, the trolley helps contain minor leaks and drips during drum handling, reducing workplace hazards and supporting compliance with environmental and workplace safety standards. Its lightweight yet robust construction ensures easy maneuverability while maintaining excellent load-bearing performance.

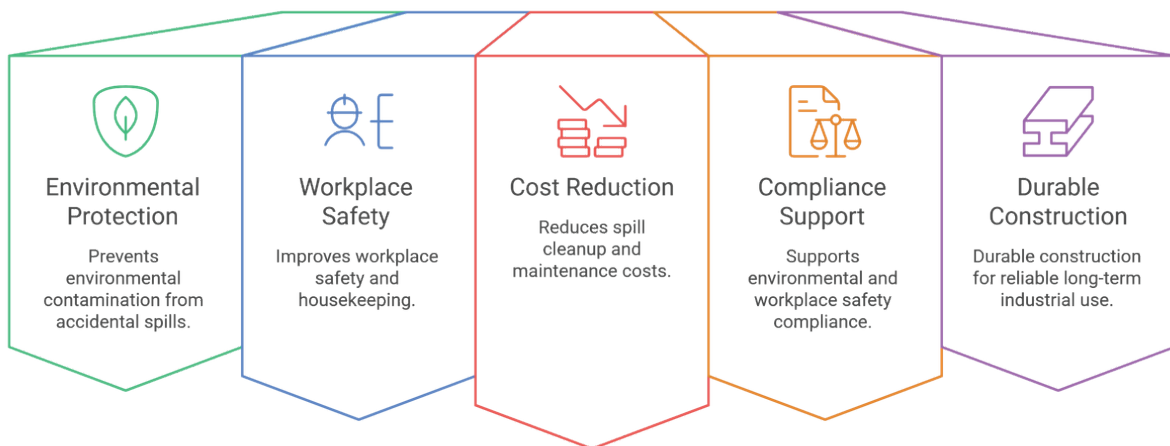

Key Features

- ✓ Heavy-duty polyethylene construction for long service life
- ✓ Integrated 20-litre spill sump for leak containment
- ✓ Chemical, corrosion, and UV resistant
- ✓ Suitable for transporting standard industrial drums
- ✓ Forklift compatible for easy material handling
- ✓ Built-in drain plug for quick and easy cleaning
- ✓ Lightweight yet strong construction for easy operation
- ✓ Suitable for both indoor and outdoor applications

Applications

Chemical Storage • Oil & Lubricants • Hazardous Liquids • Solvents • Manufacturing Plants • Warehouses • Laboratories • Oil & Gas • Maintenance Workshops • Logistics & Distribution Centers

Technical Specifications

Specification	Details
Model	
Product	Poly Drum Trolley
Material	Polyethylene
Dimensions (H × W × D)	1120 × 770 × 770 mm
Spill Sump Capacity	20 Litres
Static Load Capacity	240 kg
Dynamic Load Capacity	200 kg
Gross Weight	9.5 kg
Forklift Operation	Yes
Drain	Yes
Colour	Yellow (Standard)
