

90 Min Safety Cabinet **SSC090TW**

This 90-minute fire-resistant safety cabinet is engineered for the secure indoor storage of flammable liquids. Designed to comply with international safety standards, the cabinet provides superior protection in case of fire, offering a tested fire resistance of 90 minutes. Ideal for laboratories, manufacturing plants, workshops, and storage facilities.

Features:

- Fire Resistance: 90-minute tested fire resistance (EN 14470-1 Type 90)
- Material: Double-walled steel construction with fireproof insulation
- Doors: Self-closing, self-latching doors and automatic closure in the event of a fire
- Ventilation: Integrated air vents with flame arrestors
- Shelves: Height-adjustable, galvanized steel or powder-coated shelves
- Locking: 3-point locking system with cylinder lock and key
- Finish: Epoxy-polyester powder-coated
- Grounding: Earthing point provided for safe static discharge
